

Brunswick Terminal Station upgrade

August 2015 Update

Artist impression of the upgraded Brunswick Terminal Station

Dear Sir/Madam,

Welcome to the fifth construction update on the Brunswick Terminal Station upgrade project.

Project Update

I am pleased to advise that we remain on-schedule to complete the upgrade by the end of 2016.

As flagged in our last edition, we are installing tilt-up walls for both new buildings. The concrete panels of the 66kV building were cast with a tree motif, which will look great when the project and the associated landscaping are complete.

You may also soon notice the staggered removal of the shipping containers on site. The containers on King Street will soon be removed to make room available for upcoming construction activities. The shipping containers were installed to act as a sound barrier for adjacent residents during particularly noisy works. These works are now coming to an end. No shipping containers will remain on site after works are complete.

I am also very pleased to announce that AusNet Services is now a proud sponsor of the Brunswick Zebras Football Club, based next door in Sumner Park. The Brunswick Zebras is a fantastic community institution that is highly valued by many in the local area for encouraging outdoor activity for all ages.

Upcoming works

We will soon reach a major construction milestone with the delivery of new transformers. The transformers are very large and deemed an oversized load requiring traffic management for delivery. For this reason a temporary clearway will be required twice along the northern side of Glenlyon Road, between Nicholson and King Street over the coming months.

Please see over for more details of the temporary clearways.

Thank you again for your patience during these critical infrastructure works.

Please contact me if you have any queries or feedback about these works or any other activities associated with the project.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Sandra'.

Brunswick Terminal Station upgrade

August 2015 Update

WORKS NOTIFICATION: Transformer deliveries, 24 August and 14 September 2015, Glenlyon Road

The delivery of the transformers requires the northern side of Glenlyon Road, from Nicholson Street to King Street clear of parked cars (see map). The City of Moreland and VicRoads have approved temporary clearways with tow away zones for the two deliveries. An approved Traffic Management Plan, signs and traffic management staff, will be in place on the day.

When: *Delivery 1:* early hours of Monday 24 August 2015 (one transformer)

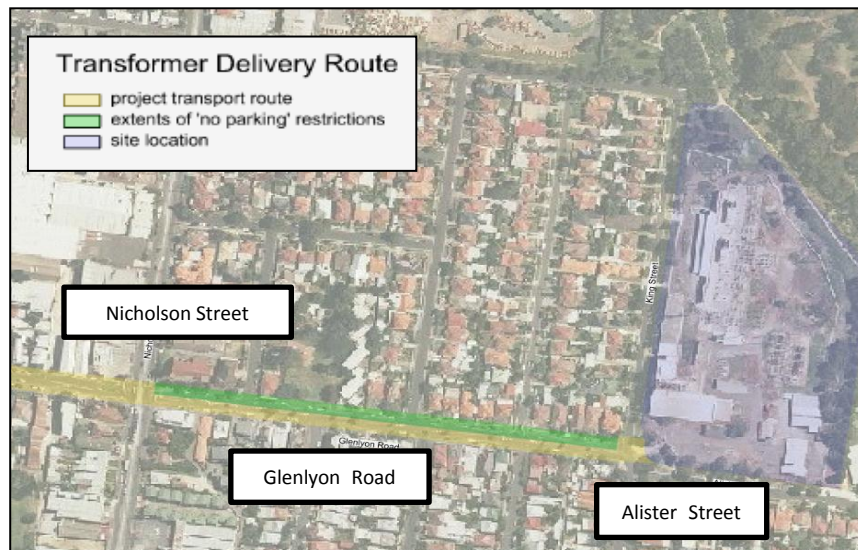

Delivery 2: early hours of Monday 14 September 2015 (two transformers)

Temporary parking restrictions will apply on the northern side of Glenlyon Road, between Nicholson and King Streets, Brunswick East from the evening before the delivery days – parking signs will be in place.

We will deliver a reminder notice to Glenlyon Road residences in advance of each transformer delivery and thank the community for their cooperation.
