ISSUER PROFILE

Overview of AusNet Services

AusNet Services Ltd (“AusNet Services”) and its subsidiaries (the “Group”) is a diversified energy infrastructure business that owns and operates the primary regulated Victorian electricity transmission network (“AusNet Services Electricity Transmission Network”), as well as an electricity distribution network in eastern Victoria and a gas distribution network in western Victoria. The Group has also a portfolio of unregulated infrastructure assets and provides specialised utility related solutions, focusing on asset intelligence, metering, telecommunication services, energy use, energy storage, energy efficiency and other niche services.

The following diagram shows the industry segments in which AusNet Services’ regulated businesses operate.

AusNet Services is a public company which is listed on the Australian Securities Exchange (“ASX”) and has a secondary listing on the Singapore Exchange Securities Trading Limited (SGX-ST”). The ASX code is “AST” and the SGX-ST code is “AUSNET SERVICES (AZLSI)”.

**Notes**

(1) AusNet Services Finance Trust, several intermediate holding companies and some minor subsidiaries with no substantial assets are not shown in the chart.

Audited annual consolidated financial accounts for the period ended 31 March 2016 and auditor reviewed interim consolidated financial accounts for the period ended 30 September 2015 for the Group are shown in attachment 1.

**Overview of Assets**

A large proportion of AusNet Services' revenue is regulated, providing predictable and stable revenues and cashflows. Regulated revenues are subject to regulatory periods. These periods are generally five years and are staggered, which lowers earnings volatility.

A map of AusNet Services' assets is shown below:
Electricity Transmission Network

AusNet Services’ primary electricity transmission network is regulated by the AER and consists of approximately 6,700 km of transmission lines operating at extra high voltages that carry electricity from power stations to electricity distributors and large customers throughout Victoria. The Victorian transmission network is centrally located amongst the five eastern States of Australia that form the National Electricity Market and provides key links between the electricity transmission networks of South Australia, New South Wales and Tasmania.

Electricity Distribution Network

AusNet Services’ electricity distribution network is regulated by the AER and carries electricity from the Victorian transmission network to substations for distribution to connected electricity customers in eastern metropolitan Melbourne and the eastern part of Victoria. The network spans an area of approximately 80,000 square kilometers.

Advanced Metering Infrastructure

The Victorian Government mandated the rollout of smart electricity meters in Victoria. It also established a range of functional and service level specifications for the program, as well as a framework for the regulated recovery of costs associated with the program pursuant to the AMI Cost Recovery Order in Council which allows for the recovery of prudent costs of implementing the AMI program. From 2016, AMI metering charges are regulated under the Electricity Distribution Price Review.
Gas Distribution Network

AusNet Services’ gas distribution network is regulated by the AER and carries natural gas from
the transmission network across 60,000 square kilometres of central and western Victoria. The
gas distribution network is approximately 10,800 km in length and AusNet Services also owns
approximately 180 km of gas transmission pipelines.

Commercial Energy Services

The Commercial Energy Services (CES) business delivers the Group’s current unregulated
activities and the growth of such activities for AusNet Services. The business can broadly be
divided into two: Infrastructure Services and Select Solutions. Select Solutions has three areas of
focus: Asset Intelligence, Telecommunications and Metering. These three divisions, along with
Infrastructure Services, form the four portfolios of the CES division of AusNet Services.

Infrastructure Services represents AusNet Services’ ownership and operation of a portfolio of
unregulated infrastructure assets. These investments consist primarily of network infrastructure
assets which fall outside the economically regulated asset base. The investments are made
through directly negotiated agreements, pursuant to which AusNet Services typically receives
revenue over the productive life of the asset in exchange for the network service and infrastructure
provided.

Select Solutions provides unregulated services on behalf of the CES division. Its three portfolios,
Asset Intelligence, Telecommunications and Metering, provide services to utilities, government,
telecommunication providers, energy and water retailers including industrial and commercial type
customers. These services include network and contestable metering, geospatial services, data
analytics, asset inspection and technical services (such as chemical testing and asset condition
monitoring) as well as the leasing of communications infrastructure and space on the Group’s
sites and assets.
